---

PROFESSIONAL SUMMARY

Senior Full-Stack and AI Automation Engineer with 6+ years of proven experience designing, building, and deploying production-grade systems at scale. Currently serving as Head of Engineering at Matchez (UK) and CTO at JoyUnity Innovations (US). Specializes in modern JavaScript ecosystems Next.js, Node.js, TypeScript cloud-native architectures, and intelligent automation powered by large language models.
Delivered multi-tenant SaaS platforms, AI-driven workflow engines, mission-critical NEMT transportation systems, HIPAA-conscious healthcare portals, and production real estate management platforms across global markets.

TECHNICAL SKILLS

Domain	Technologies
AI & Automation	LLM Integrations, AI Agent Development, RAG Pipelines, Prompt Engineering, LLM Fine-tuning, Workflow Automation, n8n, Supabase Vector, Playwright
Frontend	Next.js, React.js, Vue.js, TypeScript, JavaScript, Tailwind CSS, Bootstrap, Vite
Backend	Node.js, Express.js, Laravel, PHP, REST APIs, Microservices, CodeIgniter
Databases	PostgreSQL, Supabase, MySQL, MongoDB
DevOps & Cloud	AWS, Docker, CI/CD, GitHub Actions, GitLab, Coolify, Linux
Design & Testing	Figma, Playwright, API Testing, JWT Security

---

PROFESSIONAL EXPERIENCE

Head of Engineering Team

Matchez · UK | Nov 2025 – Present

- Joined as Senior Software Developer (Nov 2025), architecting and delivering core platform features for a production matchmaking and social platform.
- Promoted to Head of Engineering (Jul 2026), owning the full engineering function: technical strategy, system architecture, team coordination, and delivery.
- Driving platform scalability, engineering standards, and end-to-end ownership of the technical roadmap.

CTO / Head Manager

JoyUnity Innovations · **United States** | Feb 2025 – Present

- Leading all technical operations as CTO engineering vision, architecture decisions, and technology strategy across all products.
- Managing and mentoring the engineering team through full product development cycles, ensuring scalable, production-grade delivery.
- Driving innovation in full-stack systems, AI integration, and cross-platform engineering as the company's most senior technical leader.

Software Engineer

Shaun Software Hub · **Pune, India** | Feb 2025 – Present

- Designing and deploying scalable full-stack applications for client and internal products.
- Building AI-powered automation systems to streamline business workflows using LLMs and Playwright.
- Leading architecture, development, and end-to-end testing of production systems.

Software Developer

Chandorkar Technologies OPC Pvt. Ltd · **Pune, India** | Jul 2023 – Feb 2025

- Built scalable web applications and APIs across multiple client platforms using React, Vue, Next.js, Node.js, and Laravel.
- Improved system performance by 35% and optimized database efficiency across projects.
- Deployed secure cloud-based solutions using Docker, AWS, and modern DevOps practices.

Senior Software Developer

TaScript · **Patiala, India** | Jun 2022 – Jun 2023

- Led frontend and backend development for mobile and web platforms with Laravel, Node.js, React, and Vue.
- Optimized deployment pipelines and improved system stability across production environments.

Full-Stack Developer (Part-time)

InIndia · **Bengaluru, India** | Mar 2022 – Dec 2022

- Designed and developed an employee management system using Laravel, MySQL, and JWT authentication.
- Delivered a secure, production-ready system for internal operations.

PHP Web Developer

Protolabz eServices · **Phagwara, India** | Oct 2021 – Jul 2022

- Built and maintained CMS and eCommerce platforms using PHP, Laravel, WordPress, and Shopify.
- Improved performance, modernized UI components, and delivered backend API integrations.

Full-Stack Developer

navQuery · **Dar es Salaam, Tanzania** | Oct 2018 – Jun 2021

- Contributed to a MERN-based search engine platform (React, Node.js, Express, MongoDB).
- Designed user interfaces and backend services for scalable search architecture.

KEY PROJECTS

Faanoole Properties - Production Real Estate Platform

`Next.js · TypeScript · Supabase · PLpgSQL · Tailwind CSS`

Production-grade, full-stack apartment management platform live with real tenants, leases, payments, and maintenance operations. Features a no-login unit booking system with reference-code tracking, a resident portal (lease documents, rent payments, maintenance tickets), a full admin dashboard, technician role workflows, PDF receipt generation, tour scheduling, and an integrated AI assistant. Battle-tested schema audited for RLS, indexing, and additive migrations.

Live: faanooleapartments.com

AutoOps Schools - Multi-Tenant AI SaaS Platform

`Next.js · TypeScript · Supabase · Claude AI · pdf-lib`

AI SaaS platform engineered for Tanzanian primary and secondary schools. Transforms days of manual academic reporting into under 5 minutes — auto-validates data, calculates Tanzania' s grading boundaries (primary A–E, O-Level divisions), ranks every student by class position, generates Claude AI personalized report comments per pupil, and produces print-ready branded PDF report cards. Built with Supabase RLS for strict school-level data isolation, role-based access control, and AI comment caching to manage API costs.

FastTrack Transportation - NEMT Operations Platform

`Next.js · Supabase · TypeScript · Tailwind CSS`

Mission-critical Non-Emergency Medical Transportation platform serving FastTrack Transportation LLC in Madison, Wisconsin. Powers the full trip lifecycle: real-time ride booking, wheelchair-accessible vehicle scheduling, Medicaid billing data integration, driver dispatch, and live GPS tracking. **10,000+ trips completed · 98% on-time pickup rate · 4.9/5 from 500+ clients.**

Live: fasttracktransportationllc.com

Brightway Home Care - Healthcare Digital Platform

`Next.js · Supabase · TypeScript · Tailwind CSS`

Full-stack digital platform for a licensed adult family home in Madison, Wisconsin. Built with HIPAA-conscious architecture — minimal data exposure, secure form handling, privacy-first design — real-time inquiry management via Supabase, and a 24/7 accessible portal for prospective clients and families.

Live: brightwayhomecarellc.com

Niccian Group Ltd - Enterprise Corporate Platform

`Laravel · HTML5 · JavaScript · Bootstrap · MySQL`

Fully responsive corporate platform for a Tanzanian enterprise client, featuring structured service portfolios, company milestones, and a guided client contact flow. Delivered a **60% measurable increase in client inquiries** within months of launch.
